

Author Talk with Robert Nwadiaru

Nigeria: A Failed State?

February 12, 7 - 9:30 pm

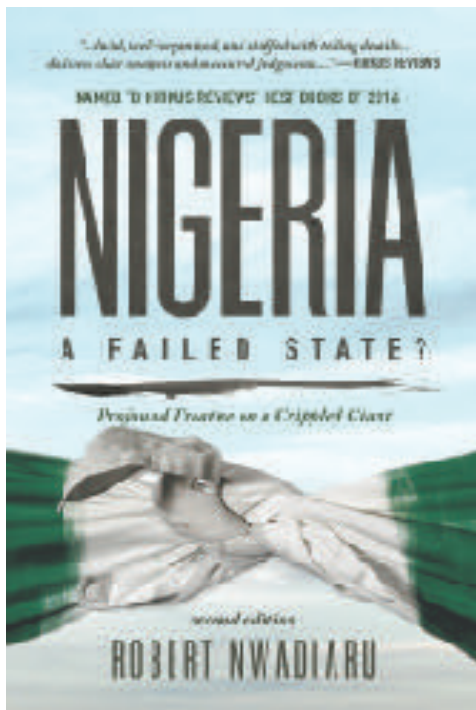

Political repression, rampant corruption, ethnic and sectarian strife, crumbling infrastructure, energy shortages, and an economy hooked on oil and mining all make Africa's most populous country a basket case, according to this hard-hitting jeremiad.

Robert Nwadiaru ranges through Nigeria's history since it gained independence in 1960, finding in it a story of vast potential and natural resources that have been squandered by misrule.

A former Religious Brother, Nwadiaru has passion for what is happening in human society. He has written many articles in various publications.

"An impassioned, eye-opening take on a critical African nation...lucid, well-organized, and stuffed with telling details...delivers clear analysis and measured judgments..." (Kirkus Reviews)

Best Books of 2016
